Adarsa Services partners with Banks, Financial Institutions and Regulators in the finance industry to provide IT Modernization solutions to enable Digital Transformations.

We believe we can make the world a better place by growing financial inclusion with financial technology (FinTech) and innovation.

Vision

We want to become a leading IT solutions provider by solving our customers' most pressing issues and delivering continued results.

Mission

Adarsa Services is on a mission to grow financial inclusion through financial technology (FinTech). We believe emerging technology can transform existing financial services business models to provide more secured, convenient, low-cost access to financial services for the unbanked and the underserved.

Core Capabilities

We believe that the success of our organization is based on the results driven by quality and dedication of our People. We offer a team of business professionals and technology subject matter experts that have the industry experience, domain knowledge and skill set to design, deliver and manage life-cycle IT solutions that facilitate your agency's mission.
